

1967-69 Chevrolet Camaro Regular Production Options (RPOs) with Official Chevrolet Production Records and Dealer Pricing Version: 23-Feb-2000													OTC = over the counter (service)	12000 = all models	
Copyright, 1997-2000, Camaro Research Group Production data courtesy of Len Williamson, based on his original research. See other credits, revisions, footnotes and references at the end of the spreadsheet. The dependencies are a first-cut and are known to have errors - do not rely on these data. Prices are for a particular point in a model year and don't attempt to reflect mid-year price changes. Codes are in alphanumeric order. Note that Uniform Product Code (UPC) organization was a moving target and changed with time. The codes for all years don't always literally fit within the single UPC organization shown. For example, the N61 code that was a dual-exhaust system for 1967 later was engulfed by the "Wheel and Tire" group. To overcome this we attempt to provide thorough cross-references.													n/a = not applicable	12x37 = coupe	
													n/l = not listed	12x67 = convertible	
													incl = includes	124x7 = V8 engined car	
													S/T = standard transmission	123x7 = L6 engined car	
													A/T = automatic transmission

Credits, Revisions, and Footnotes													
<p>Begun 1997, Rich Fields 09MAR99, Jon Mello (added 67 pricing) 23JUN99, Rich Fields (corrected, updated, and completed first release draft) 23FEB00, Rich Fields (final pre-release corrections) Pricing from Chevrolet price lists typical for the model year. Due to mid-year changes, other pricing lists exist. Production quantities from "Tailfins & Bowties", copyright 1990, Len Williamson, ISBN 0-9622724-3-4, with permission from the author. Production totals are listed as "US Plants" only. It doesn't appear that vehicle assemblies at foreign plants are fully included in these totals. Production data is only available for ordering options. Options generally required for certain markets, like V48 HD anti-freeze used in Canadian orders, were not logged by GM. There are significant disconnects in engine production versus vehicle production involving Z28 in 67 and ZL1/L72 in 69. It is possible that 67 Z28 was recorded by the factory as 327 production, and ZL1/L72 as 396 (L35?) production. The L89 is assumed to be a head option with L78 required - otherwise there would be an additional disconnect. In option dependency lists: comma list in parens means logical "or" space separated items means logical "and"</p>

	N	Y	Y	woodgrain dash molding (and bright dash accent in 68)									
	N	N	Y	dash assist handle									
Note: Z87 included Z23 in 1968 and 1969, but the 69 Z87 woodgrain molding extended beyond what was used for Z23
